

## Advanced DSL Connection Instructions

*Any DSL Modem with Wireless Router for Multiple  
Computers (distribute with "Basic" or IPTV" document)*

# Your DSL Modem and a typical wireless router

Front View

Back View

## **Step 1: Connect the Cables**

From Left to Right:

1. Ethernet network cable from “Internet” port on router to DSL modem
2. Ethernet network cable to computer
3. Wireless router power cord
4. Phone cord from DSL modem to wall jack
5. DSL modem power cord

### **VERY IMPORTANT !!!**

The ethernet port on the DSL modem must be connected to the “Internet” port on the wireless router. Up to 4 computers can be directly connected on the remaining 4 ports. Any number of additional computers can connect wirelessly with the appropriate wireless adapter

installed. See accompanying “Basic” or “IPTV” instruction document for specific steps for your DSL modem.
